

Strength You Can Drink.

Pessnano **D3**

Vitamin D3 Oral Solution 60,000 I.U

Vitamin D3

- Stimulates production of calcium-binding proteins in the gut.
- Facilitates deposition of calcium into the bone matrix, improving strength and density.
- Lowers PTH, preventing bone resorption and maintaining calcium balance.
- Regulates T-cell and macrophage function to enhance innate and adaptive immunity.
- Improves nerve conduction and muscle contraction by maintaining serum calcium levels.
- Influences serotonin synthesis and brain health, reducing risk of depression in deficiency.
- May support glucose metabolism by aiding insulin secretion and action.
- Plays a regulatory role in immune modulation, helping prevent diseases like MS or RA.

Vitamin D3 deficiency

Weak immunity

Rickets in children

Osteoporosis & osteomalacia
